Do your eyes feel tired or make you tired at the end of a workday? Yes ____ No ____

Hobbies: _____

Sports or Outdoor Activities: _____

Your examination includes a medical eye health evaluation. We highly recommend having a retinal photo taken to better examine the health of the inside of your eyes. Most eye diseases have no symptoms. Dilation or using drops to open the pupil of the eye may be necessary at the doctor's discretion. Our doctors also diagnose, manage and treat dry eyes, acute or chronic eye diseases, including pink eye, glaucoma, macular degeneration, and cataracts.

Please select to receive more information our services:

Dry Eye Treatment, Intense Pulse Light (IPL)

Laser Vision Correction (LASIK)

Contact lenses: enhance eye color, astigmatism, bifocals, scleral lenses for keratoconus and high astigmatism

Ortho K Corneal Molds: decrease myopia without surgery to see clearly during the day without glasses or contacts

Vision Therapy to improve visual motor or perceptual skills related to reading and computer

Children's Vision: Developmental vision problems that interfere with learning or sports;

Lazy eye, strabismus, amblyopia

Brain Injury after stroke or concussion: loss of side vision, reading or driving problems
